Numerical Methods (6BER03), 2025-2026

Lists (refresher)

- Ordered, mutable containers
- Methods to add, remove, sort, manipulate elements
- Zero-based indexing, slicing
- Typical numerical use: storing samples, time series

```
my_list_of_numbers = [1, 2, 3]
my_list_of_strings = ["apple", "banana", "cherry"]
my_list_of_booleans = [True, False, True]
my_list_of_lists = [[1, 2], [3, 4, 5], []]
my_heterogeneous_list = [1, "apple", 3.14, True, [1, 2], {"a": 1}]
my_list_of_numbers.append(4) # Now: [1, 2, 3, 4]
```
